# “LIGHT” TV DVB-T internal on glass antenna

P.No. 7137122

## TECHNICAL FEATURES

|                    |                                              |
|--------------------|----------------------------------------------|
|                    | <b>DVB-T</b>                                 |
| Frequency Range    | 44-68MHz / 174-230MHz / 470-862MHz           |
| Output Impedance   | 75 Ohm                                       |
| Power              | 12V dedicated power with internal protection |
| Consumption        | 31mA typ                                     |
| Gain               | 14dB $\pm$ 2                                 |
| Noise Figure       | <3dB                                         |
| Cable type         | 75 Ohm RG174 lowloss                         |
| Cable Length       | 3m                                           |
| Connectors         | Mini Jack male Ø3,5mm                        |
| Dimensions (LxBxH) | 280x25x15 mm                                 |
| Weight             | 80g                                          |
| Mounting type      | Adhesive (3M)                                |
| Mounting position  | On glass                                     |
| Temperature Range  | -40°C to +85°C                               |
